

Want to know how your research is impacting policy?

Want to **visualize** that impact and be able to share it with colleagues, deans, and grant committees?

Powered by **Overton**, the world's largest searchable index of policy documents, guidelines, think-tank publications and working papers, the **free-to-use Sage Policy Profiles** will allow you to

Discover

where your work is cited in policy documents, packaged on a personalized dashboard

Export

any policy mentions in one file

Visualize

your data in a downloadable format

Share

your personalized dashboard

Try the free tool for yourself

Sage aims to expand how we understand research impact from purely scholarly terms to how research benefits policy, practice, and the public. We know that this type of change will take time, but as an independent company, we're free to commit to this goal long term. Learn more: group.sagepub.com/social-behavioral-science-impact
